

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently Amended) A liquid crystal display including a pixel area and a driving circuit, comprising:

at least two electrode links each extended from the pixel area wherein one electrode link is longer than the other electrode link; and

at least two pad members in contact with the driving circuit and the electrode links, wherein each pad member includes:

an electrode pad connected to the electrode link; and

a transparent electrode in contact with the driving circuit and the electrode pad,

wherein the transparent electrodes of the at least two pad members have different lengths, and wherein the transparent electrode associated with the longer electrode link is longer than the other transparent electrode is lengthened in order to compensate for a resistance difference between the two electrode links due to their different lengths ~~increase a contact area and reduce a contact resistance in order to compensate for a high resistance of the electrode link.~~

2-3. (Canceled)

4. (Currently Amended) A liquid crystal display according to claim 1, wherein the transparent electrode associated with the longer electrode link extends ~~is extended~~ toward the pixel area ~~to have a different length~~ along the length of the electrode link.

5-41. (Canceled)
